### DETAILED ACTION

In response to the amendment filed 2/12/2004 all the amendments to the claims have been entered and the action follows:

#### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Addiego in view of Levy et al (US 4579455).

With respect to claims 1-39, the rejections are maintained and incorporated by references as set forth in the prior office action paper # 11. Furthermore, Addiego also discloses the desired images, (see col. 8, lines 58-65, the images are the one that are to be inspected) as claimed.

***Response to Arguments***

3. Applicant's arguments filed 2/12/2004 have been fully considered but they are not persuasive.

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, Addiego discloses a wafer inspection system that scans the wafer into plurality of images corresponding to the respective areas select two of the plurality of areas (see figure 2A, scanning of the wafer, see col. 5, lines 35-40, and figure 7, that shows the wafer 14 with the plurality of dies i.e. plurality of images, and the two adjacent images are selected for the evaluation, see col. 10 for the description); deriving a spatial relation between the selected images, and forming the pattern to be recognized (see col. 8, lines 59-68, the inspection system acquire the image of the wafer, select the two images, the two images are adjacent "spatial relationship between the two selected images" and then subtract the two images to get the pattern i.e. the defect that gets classified i.e. "to be recognized"). Levy teaches that the inspection instruction can be incorporated into

Art Unit: 2623

microprocessor via a tape cassette or well by manual controls "based on an input by a user of the inspection apparatus" (see col. 5, lines 51-58) as claimed.

It would have been obvious to one ordinary skilled in the art at the time of invention to simply use the feature as disclosed by the Levy of selecting the images using the windows in to the Addiego's inspection system in order to provide a improved defect detection method by reducing undetected defects and reducing false detected defects. And, the motivation comes from the knowledge generally available to one of ordinary skill in the art.

### ***Conclusion***

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
